MARKET SYSTEM ANALYZER UPDATE IS RELEASED

Adaptrade Software has released version 2 of Market System Analyzer (MSA) for stock and futures traders. The program is designed to improve trading results for existing trading systems and methods using a combination of money management methods and statistical analysis techniques. TradeStation code is included so that TradeStation users can add position sizing to their systems. A 30-day trial can be downloaded.

GENESIS INTEGRATES TOTALVIEW WITH PLATFORM, TEAMS UP WITH TRADEBOLT

Genesis Securities said it had integrated NASDAQ TotalView with its Laser Trading Platform. TotalView provides access to all quotes and orders at all price levels from NASDAQ participants, which allows traders and institutions greater flexibility and the added advantage of viewing the market in

its entirety.

In other news, **Genesis** announced it would be in a strategic collaboration with **TradeBolt**. TradeBolt sends system-generated orders from any platform to Genesis for execution. Using the TradeBolt Universal Link, automated order execution can be added to any system or indicator as well. TradeBolt allows for fully automatic trading and order execution, regardless of the system or programming language.
